Trouble shooting

- Applicable To: All DreamWave Bluetooth speakers.
 - The trouble shooting steps in this article apply if audio is intermittent, crackling or distorted when streaming via Bluetooth.
- Try playing other audio files. Ensure that audio can play fine from the same audio device when using a headphone.
 - If Step 1 is not the case, try listening to audio by connecting the speaker to the Bluetooth device using the Aux-in cable. This will isolate if it's a Bluetooth connection issue or not. Remember to disconnect/un-pair the Bluetooth connection first.
 - If the issue only happens when connecting via Bluetooth, do the following:
 - Check that you are connected to the correct speaker (i.e. select "Bubble Pods" within the Bluetooth list on your device).
 - Check that the volume is not set to minimum.
 - Ensure that the distance between the speaker and the Bluetooth device is with the distance of 10 meters.
 - Turn the speaker off and turn it on again to reset the speaker.
 - Clear the current pairing selection of your Bluetooth device.
 - To further isolate the problem, do please shut down all other surrounding Bluetooth devices.
 - Try to re-pair the speaker with the Bluetooth device.
