2/7 QUICK START | FIRST USE

PRE CHARGED
All Xtorm chargers are pre-charged. You can instantly start charging your mobile device.

Connect the charging cable to the device and press the power button to start charging.

1/7 PRODUCT OVERVIEW

SPECIFICATIONS

- Battery: 10,000mAh Li-polymer
- Solar panel Input: 5V/2A
- Output: 2x USB 5V/2.1A (max 10.5W)
- Dimensions: 153x85x18mm
- Weight: 273 grams
- Extra feature: Splash-proof (IPX4)
- Drop-resistant 1m
- Built-in flashlight

Including: Micro USB cable, Carabiner and manual

High Efficiency Solar Panel
SPLASH PROOF IPX4

IN THE BOX

SOLAR CHARGER

MICRO USB CABLE

CARABINER

MANUAL

PRE CHARGED

Xtorm chargers are always pre-charged. This means you can start using your new Solar Charger from the moment you remove it from the box.

AUTO-STOP CHARGING

The Xtorm Solar Charger automatically stops charging when the connected device is fully charged. This means you do not have to worry about overcharging your mobile devices.

IPX4 SPLASH PROOF

Thanks to the rubberized housing and protected openings this Solar Charger has an IPX4 classification. This means it's splash-proof.

HIGH EFFICIENCY SOLAR PANEL

All Xtorm Solar Chargers are equipped with extremely efficient solar panels. With an efficiency of 22%, these panels can generate a lot of power with a small surface area. These SunPower® panels are the best solar panels available on the consumer market.

2 YEAR WARRANTY

All Xtorm products have a 2 year warranty in case something goes wrong. We ensure that you will receive a replacement if the product fails within 2 years.

EN: Warnings

Don't drop, disassemble or attempt to repair the charger by yourself.
Don't expose to any fire.
Keep out of reach of children.
Don't use in the presence of flammable gas.

NL: Waarschuwing

3/7 CHARGE YOUR MOBILE DEVICE

Connect with your mobile device using the supplied micro USB or your own cable.

Connect the USB cable with charger and press the power button to start charging.

Your smartphone will indicate charging status.

4/7 CHARGE 2 DEVICES AT THE SAME TIME

⚠ Important

When charging 2 devices at the same time, the total output of the Solar Charger is divided between the two devices.

E.g. when charging a tablet and smartphone, connect the tablet to port 1 and the smartphone to port 2.

5/7 FREE TIPS AND TRICKS!

Best illumination angle

Do not leave out in the rain

Best place to charge is outside

Best degree of cloudiness

Best time of the day

The solar panel doesn't work behind a window*

*Light does travel through glass, although some of this is blocked by the iron content in glass. In addition to this some light is reflected, meaning that a significant amount of power will be lost.

This will vary depending on the specific glass used as well as other factors, but the power loss could be in excess of 50%.

6/7 CHARGE THE SOLAR CHARGER

EXAMPLE: CX005 - XTORM USB AC ADAPTER

MICRO USB

METHOD 1: Connect the micro USB cable with USB IN (behind the waterproof cover).

Connect the USB cable to a power adapter or a laptop/PC.

Expect 6 hours* charging time (100%)

⚠ IMPORTANT

When charging for the first time we recommend that you charge the Solar Charger by USB with the included cable.

Also, when the internal battery of the Solar Charger is completely empty, you may have to charge it by USB power for a few minutes. Sometimes the charger needs a small energy boost before being able to generate solar power into energy.

METHOD 2: Place the Solar Charger in direct sunlight (doesn't work behind a window) and the battery will be charged automatically.

The energy needed to charge an average smartphone from 0 to 100% will be collected within 1 day of sunshine*

Expect 1 day of sunshine to charge 20% of the Solar Charger's internal battery. The Solar Charger is fully charged in around 4-5 days of sunshine*

* By ideal conditions
